### A WORTHY SUCCESSOR.

Of the Fifteen-Block Nightmarer, Gone

But Not Forgotten.

The fifteen-block puzzle at last has a rival,

and a formidable one, too. The inventive

and hard-thinking American, not satisfied

with the dreary and awful results attending the

general introduction of that 14-15 block

combination, has once more boldly come to the

front, and invited the world to go crazy over

his new game, which he styles "The Battle of

31." The first specimen arrived in Wheel-

ing, came in company with an Eastern drum-

mer. Drummers are responsible for a large

amount of the woe and sorrow of this age.

The game in itself is apparently simple

enough—up, was the fifteen-block puzzle—

but it is not.

There is a wooden box about 4 1/2 inches

in size and a quarter of an inch deep. There

are six grooves that run the length of the box

and each groove is 4 inches of wood like those

used in the 15 block. Those in the first groove

are all numbered 1; those in the second 2,

and so on as shown by this diagram:

1	1	1	1
2	2	2	2
3	3	3	3
4	4	4	4
5	5	5	5
6	6	6	6

The blocks being all on one side of the box

as shown in the diagram, two persons sit

down and alternately move one or two of the

blocks to the other side of the box, the

object being to reach the number 31. For in-

stance, 1 block moves 1; No. 2, 2; No. 3, 3;

No. 4, 4; No. 5, 5; No. 6, 6; No. 7, 7; No. 8, 8;

No. 9, 9; No. 10, 10; No. 11, 11; No. 12, 12;

No. 13, 13; No. 14, 14; No. 15, 15; No. 16, 16;
